

Ground Wire Static Kit

Model: S5, Scout 5 Sweeper

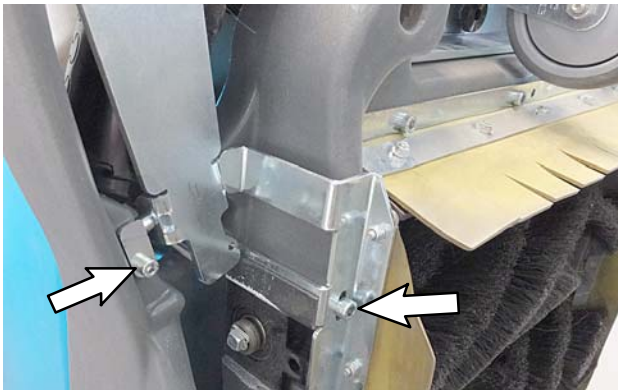

The kit includes the necessary part to eliminate nuisance static shock at control handle. This kit is intended on models manufactured before following serial numbers: S5 model s/n S5004614, Scout 5 model s/n 5001807 (October 2015). Carefully follow the installation instructions as described below.

INSTALLATION INSTRUCTIONS:

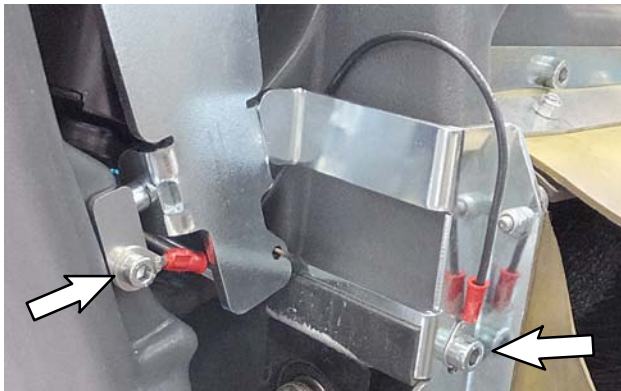

Tool Required: 4mm and 5mm hex wrench

FOR SAFETY: Before servicing machine, park machine on level surface and remove key.

1. Carefully tilt machine back on handle.
2. Remove side brush from machine.
3. Remove the two hex screws as shown.

4. Route kit wire as shown and secure with the removed screws.
